

Innovations and highlights: These are the products exhibitors will bring to NUFAM 2023

From 21 to 24 September, more than 400 exhibitors will present their products at NUFAM. Among them are world firsts, innovations and more.

Karlsruhe. Around 420 exhibitors, more than ever before, will be presenting themselves and their products from 21 to 24 September at NUFAM - the commercial vehicle trade fair on around 80,000 square metres at Messe Karlsruhe. The exhibitors cover the entire range of the commercial vehicle sector.

A.I.matics

NUFAM 2023 will be a great opportunity to showcase A.I.matics as a solution provider for the safety factor of commercial vehicles. We believe that our blind spot A.I. video detection alerts technology will reduce pedestrian fatalities in commercial vehicles.

Afhymat

Making its debut at NUFAM will be Afhymat, a French family-owned company specialising in hydraulic kits and aluminium bodies for transport companies. At NUFAM, the company will present for the first time its model of vacuum pump units for cleaning construction site toilets.

Air Products

Air Products has been developing hydrogen refuelling solutions for more than 30 years. According to the company, it carries out around 1.5 million hydrogen refuellings a year. In 2026, the company aims to supply 650 tonnes of renewable energy per day to power vehicles around the world, avoiding three million tonnes of CO2 emissions annually. At NUFAM, Air Products will present its concepts for hydrogen supply solutions and liquid hydrogen filling stations.

Al-Ko

The AL-KO Vehicle Technology Group is a fast-growing global technology group and a business unit of DexKo Global. With high-quality chassis and suspension components for trailers, recreational and commercial vehicles as well as construction and agricultural vehicles, the group of companies stands for functionality, comfort and innovative strength for more driving safety.

nufam.de

NUFAM, one of the leading commercial vehicle trade fairs, offers us the opportunity to present our Mercedes-Benz Pössl Campstar, especially to regional customers, and thus to make new contacts. As the oldest Mercedes Benz dealership in the Rhine-Neckar region, we are absolutely convinced of the concept of camping with your own vehicle and see NUFAM as the ideal platform to present our product highlight.

Azur

The Alliance for the Future of Tyres (AZuR), together with 56 partners from industry, trade and science, is committed to a climate-friendly tyre recycling economy. Used commercial vehicle brand tyres are to be 100 percent reused or recycled in an environmentally friendly way. This conserves natural resources and saves millions of tonnes of waste and CO2 emissions. The AZuR partner initiative ZARE guarantees the safe disposal and best possible recycling of used commercial vehicle tyres by certified specialist companies.

Beijing Smarter Eye Technology

Beijing Smarter Eye Technology was founded in 2014 and is the first company to develop and manufacture a binocular ADAS stereo camera in China. To date, our cameras have been installed in over 100,000 commercial vehicles in China, including trucks, buses, mining vehicles, taxis and other specialised vehicles.

BG Verkehr

One of BG Verkehr's focal points at the trade fair is the topic of distraction in road traffic. With virtual reality (VR) goggles and special software, male and female truck drivers can test their attention in virtual city traffic. They can try out how they react in certain situations. The VR goggles are a result of the campaign "Steer instead of distract", which the prevention experts of the employers' liability insurance association have been working on for the past year.

Binotto Group

With over 60 years of experience in the industry, Binotto Group 2023 is making its debut at NUFAM. They specialise in the design and production of hydraulic cylinders. They stand for high quality standards, reliability and state-of-the-art manufacturing processes.

Bohnenkamp

Over the past decades, Bohnenkamp has established itself as a full-range supplier of tyres and wheels, also in the truck and transport sector, as an absolutely reliable partner. Beyond the product range and the enormous availability of even large quantities, the company has earned a good reputation with its impressive service. In addition to the individual configuration of complete wheels and fitting, Bohnenkamp offers a comprehensive 360-degree service for its specialist dealers.

Burgers Carosserie

The recently announced increase in toll charges in Germany presents a significant challenge for companies in the logistics sector. In response to this pressing issue, Burgers and Karosseriewerk Meyer proudly present the groundbreaking and innovative double-decker solution that promises to reduce costs while optimising logistics operations.

City Box

Whether refrigerated bodies, flatbeds or special boxes - at cityBOX you will find the perfect solution for your individual requirements. As an internationally active manufacturer, we are present everywhere and always have partners in your vicinity. As a Europe-wide company, we use the excellent platform of NUFAM to draw German market attention to our first-class products. In this way, we set a clear signal on the market and offer you innovative solutions that set standards.

Courage Technologies

COURAGE Technologies SL is the manufacturer of 100% electric COURAGE transport refrigeration systems with their own battery with autonomy of 6-8 hours in continuous operation. Cooling completely independent of the electric/diesel vehicle. There will be an industry premiere at NUFAM: New introduction of electric COURAGE CTF3 mono- and multi-temperature cooling machines for chassis with 3.5t refrigerated box.

CSA ClimaVan Solutions

CSA ClimaVan Solutions Automotive GmbH will be presenting its products in the field of pharmaceutical equipment at NUFAM. As a specialist for temperature-controlled load compartment fittings, the company offers the classic GDP.VAN® pharmaceutical fitting and the GDP.VAN PLUS® pharmaceutical fitting for the transport of medicines in an extended temperature range. The trade fair offers a great opportunity to inspire commercial vehicle salesmen and key accounts. Visit CSA at the large VanSelect joint stand and get an extensive impression of our products in the field of temperature-controlled load compartment equipment.

Daken

Daken is a leading innovator in the field of truck&trailer accessories. Daken is looking forward to showcasing its latest range of high quality toolboxes, fire extinguisher cabinets and other accessories in plastic, steel and aluminium, carefully manufactured to meet the evolving needs and demands of the market.

Dakra

At NUFAM the DEKRA Academy will be presenting, among other things, instruction on the topics of electric drive and hydrogen drive. Both areas are currently gaining in importance in the commercial vehicle sector. For work on the high-voltage system of such vehicles, precise specifications apply with regard to the qualifications of the respective employees. The DEKRA Academy offers the appropriate training programmes in each case.

Deutsche Automobil Treuhand

Deutsche Automobil Treuhand GmbH (DAT) is an internationally active company in the automotive industry that collects, supplements, compiles, processes and structures comprehensive motor vehicle data and then makes it available to the market nationwide via a wide range of media and software solutions.

DKV Mobility

Deutsche Automobil Treuhand GmbH (DAT) is an internationally active company in the automotive industry that collects, complements, prepares, structures and then makes comprehensive vehicle data available to the market via a wide range of media and software solutions.

Dolezych

When it comes to safe lifting and transporting, there is no way around Dolezych. This year at NUFAM, the Dortmund-based manufacturer of rope, lifting, sling and load-securing equipment will once again be presenting newly developed solutions for safe transport.

Dometic

Protect the environment, save fuel, avoid breakdowns, more comfort on board: Dometic Go Power solar systems for commercial vehicles. At NUFAM 2023, Dometic will present innovative solar power solutions for commercial vehicles under the Go Power brand. Go Power solar systems have enjoyed a first-class reputation in North America for decades. Since Dometic acquired the manufacturer Valterra Products LLC

in 2021, the technology, which has proven itself millions of times over, is now also available to customers in Europe.

Cooperative State University BW Ravensburg

The DHBW will be presenting current research projects and findings from the Centre for Digitalisation in Mobility Systems at NUFAM. With the exhibits on the DHBW stand and the DHBW contributions in the Telematics Forum, we are reacting to current changes in the industry that are leading to high cost pressure and demand new solutions for optimising capacity utilisation. Our live demos in the area of autonomous driving address, among other things, the problem area of driver shortages.

EasySub

Holistic subsidy consulting for the first time at NUFAM: Government subsidies as a sensible building block for a climate-neutral future in the logistics industry. For many companies, obtaining government subsidies is still neither intuitive nor practical in terms of time. At NUFAM, the energy and subsidy experts from easysub plus will be demonstrating the most important subsidy programmes for the logistics sector directly at the stand and will be able to estimate the possible subsidy amount by means of a free subsidy check.

Edelstahlhaus GmbH

The manufacturer of storage boxes Edelstahlhaus GmbH will present proven and new solutions for additional storage space on commercial vehicles at NUFAM. Among other things, Edelstahlhaus offers storage boxes produced in Germany, the ADE storage boxes. These ADE boxes will be the focus of the exhibition.

Elexon

As an industry leader in the logistics sector, the Aachen-based loading infrastructure specialist elexon is known for developing innovations. At this year's NUFAM, the charging infrastructure experts will again showcase product solutions that e-mobility users and operators need now and in the future. These include a DC charging station with a performance of up to 480 kW including modularity of the charging capacity from 80 kW to 480 kW. Charging capacity, charging points and communication can be individually adapted.

Etesia

After more than 30 years of developing, manufacturing and selling professional mowing equipment, ETESIA SAS has now broken new ground with the introduction of the ET-Lander. ETESIA is now also a car manufacturer with the multifunctional N1 battery vehicle. Thus, the NUFAM fair in Karlsruhe , with its proximity to the ETESIA site in Wissembourg , offers the appropriate sales platform for our new product .

Euromaster

According to its own information, Euromaster is Europe's largest service network for vehicle fleets. "For Euromaster, NUFAM offers the ideal opportunity to talk to its customers and interested parties and to convince them of our broad product and service portfolio," says Julian Schlitter, Marketing Manager at Euromaster.

Europmaquinas

The latest innovations in roadside assistance equipment will be presented. Also the new Thunder-400 car charger with a maximum power of 27 Kva III, suitable for emergency charging of electric vehicles, as well as for compressed air. All this with the smallest size and lightest weight on the market.

E-Works Mobility

About E-Works Mobility: E-Works Mobility is a pioneer in the electrification of commercial vehicles and has established itself as a groundbreaking company on the European stage. With a strong focus on the circular economy, E-Works Mobility transforms conventional commercial vehicles into sustainable, high-performance electric vehicles.

Fassi

FASSI is the market leader among Italian manufacturers of knuckle boom cranes. With its product range and the number of cranes sold, the company is one of the world's leading manufacturers in the lifting equipment sector. The entire range is exported and distributed all over the world thanks to an efficient and widespread distribution network. Choosing a FASSi crane is a real investment that pays off in the long term: High quality of the product, market value and quality of service. The sales and service network in Germany comprises almost 100 partners. In addition to our regional workshops, our after-sales department and our spare parts supply at the centrally located company headquarters in Gründau-Rothenbergen are also responsible for customer support. FASSI's professionalism is aimed at meeting the various market requirements.

F&B Commercial Vehicle Technology

F&B is one of the leading vehicle conversion companies in Germany and sees itself as an interface between truck manufacturers and the body industry. In this process, the relevant add-on parts on the truck frame are arranged and relocated in such a way that the body assembly at the body manufacturer can be carried out without any problems and, if possible, without collision of truck add-on parts and body components. This saves time and money for all parties involved in the order and production process.

Fabri-Moll

Fabri-Moll - as one of the largest original equipment manufacturers - offers its customers from the transport and logistics sector a wide range of innovative and highly efficient solutions. Today, the company from Finnentrop is one of the leading addresses in the production and labelling of a wide variety of commercial vehicle tarpaulins.

FAHR-ZEIT

Since 1972 FAHR-ZEIT has been the market-leading specialist for professional drivers with a C / CE driving licence in local transport. FAHR-ZEIT provides drivers with the appropriate qualifications for a wide range of industries and special requirements - at 29 locations in Germany.

Falken Tyre Europe

Falken has prepared something very special for transport professionals: Falken's modern and advanced truck and commercial vehicle tyres not only offer improved mileage, but also exceptional load-bearing capacity and stability.

Faun

ENGINIUS is Europe's first vehicle manufacturer with an EU type approval for electrically powered trucks with hydrogen fuel cell system (FCEV). 100 BLUEPOWER hydrogen refuse collection vehicles are already in use. In addition to cities such as Berlin, Duisburg, Bochum and Brussels, the first BLUEPOWER refuse truck is now also driving in the UK.

Ford Trucks

F-Trucks Deutschland GmbH has been an official Ford Trucks general importer for almost two years and will be represented at NUFAM for the first time. Four F-MAX 500 tractor units will be presented at the main entrance and at stand E113 in hall 1.

One of the exhibits is equipped with the exclusively eligible special #Living equipment. The interior designed by F-Trucks Germany partner Dietrich GmbH with lounge corner, washbasin, microwave, entertainment package and more offers exciting solutions for the industry topic of drivers.

Frielitz

Locking beam "Fritz" sets standards in the transport industry. The continuous development of technologies in the field of load securing plays a decisive role in efficiency and safety in the transport industry. Frielitz Fahrzeugbau und Zubehör from Gechingen in the northern Black Forest is known for its innovative and patented solutions in this field.

FSP Group of Companies

The FSP group of companies, which is part of TÜV Rheinland, has also been involved in the official inspection of heavy-duty vehicles since it was founded over 30 years ago. Every FSP test engineer is trained for this and meets the requirements of the authorities through annual further training to maintain competence. In addition, FSP also offers damage and value appraisals for lorries and buses, which can be carried out in various stages of completion, including analytical examinations with ultrasound or X-rays. Whether it is a leasing return or an accident appraisal, there is a suitable type of appraisal for every need.

GEFA

GEFA BANK will once again be presenting its extensive services as one of the most important financing and service partners for the transport industry at this year's NUFAM. Entrepreneurs will learn from specialised advisors how they can realise planned investments in new commercial vehicles with tailor-made leasing, credit and hire-purchase financing.

Geocept

The software company GEOCEPT GmbH, founded in Karlsruhe in 2006, is a specialist for professional GPS tracking solutions, tacho download, fleet management, truck navigation and route planning. The following new products will be presented at NUFAM 2023: Bluetooth Beacon Tyre Pressure Monitoring Systems (TPMS), Trailer Tracker with Plug&Play connection cable for every EBS and Ex-certified tracker housing for hazardous goods vehicles.

Gergen

GERGEN will present an Apollo 2.0 series roll-off tipper and an ADONIS 6.0 series skip loader with a TTA 13 ADONIS trailer. These are the latest evolutionary stage of the respective product series with a multitude of innovative and also well-known equipment options. A particularly outstanding feature of the GERGEN roll-off tippers is the electronic-free control system with its very.

Glasurit

As part of the NUFAM trade fair in Karlsruhe, Glasurit will be presenting its entire product range as well as the latest innovations in the field of vehicle painting. Together with the exhibitor 4wheel24 from Hasloch, specialised in special vehicle construction, two exclusive expedition vehicles with special paintwork will be on display. At the exhibition stand in Hall 2, D205, visitors will be able to find out more about Glasurit's high-quality range of products and services in addition to the paint structure.

Gleichauf

Gleichauf GmbH, a certified Continental dealer based in Villingen-Schwenningen, will present the new intelligent tachograph for the first time at the NUFAM trade fair in Karlsruhe. The version of the intelligent tachograph specified by the EU Mobility Package 1 brings new and partly modified functions and provides reliable data for more efficient controls in international freight transport.

Goliath Trans-Lining

In a Maxus eDeliver 3, provided by Ebert Automobile, we show all interested parties our multiple award-winning foodstuff extension, the Trans-Clean® hygienic extension. The load compartment extension for HACCP-compliant food transport without temperature control. In a Renault Master, we will be showing our Trans-Cool fresh produce extension, which was launched this year. It turns your van into a refrigerated vehicle for foodstuffs in the temperature range from 0°C to +15°C in accordance with the Food Hygiene Ordinance & DIN 1815.

GP JOULE

GP JOULE is an integrated energy supplier active in all areas of the energy value chain: from generation to utilisation - and from consulting to financing and project planning to construction and service. GP JOULE generates and markets wind and solar power, green hydrogen and heat, and uses the energy where it is most effective: in electric and hydrogen mobility, in households and in industry.

GPSauge

We want to set new impulses at NUFAM and show that the potential of telematics is far from exhausted. In doing so, we respond with our telematics solutions to the increasing demands for efficiency, sustainability and transparency in the transport and logistics industry.

Graf Hardenberg

Graf Hardenberg is one of the most successful car dealership groups in Germany. With over 1,600 employees at 17 locations and 34 businesses in Baden-Württemberg and Rhineland-Palatinate, we represent the ten strong brands Volkswagen, Volkswagen Commercial Vehicles, Audi, ŠKODA, SEAT, CUPRA, Porsche, Ford, Vespa and Harley-Davidson. We also specialise in key accounts and fleet management.

Grantex

GRANTEX HELLENIC BRAKES INDUSTRY was founded in 1958 and has successfully manufactured friction materials (brake pads, disc brake linings, etc.) for all types of heavy and light commercial vehicles as well as for industrial applications until today. We are the only company in our sector in Greece and one of the few in Europe.

GTÜ

GTÜ Gesellschaft für Technische Überwachung mbH is the largest officially recognised motor vehicle inspection organisation of freelance motor vehicle experts in Germany, making it one of the largest expert organisations of all. It sees itself as a comprehensive network of experts. 2,500 self-employed and full-time experts and over 2,600 test engineers and their qualified staff are available at around 10,300 test centres in garages and car dealerships, as well as at more than 800 GTÜ-authorized partners' own test centres. The GTÜ test engineers work in the interests of road safety and environmental protection.

Lower Franconia Chamber of Trade

For more than 16 years, the Vehicle Academy, an educational centre of the Lower Franconia Chamber of Crafts, has been offering the "Automotive Technician Master Course with a Focus on Commercial Vehicles", which is unique in southern Germany. At our information counter in Hall 2, Stand E 212, interested parties can obtain non-binding advice on the attractive funding opportunities up to a level of 96%.

Wide awake at 80

Board member and spokesman of the prevention association "Hellwach mit 80 km/h e.V.": "This is our second time at NUFAM. We have a unique opportunity here to

meet not only the drivers, but all the players involved in the supply chain, in order to convince them to work together to curb truck accidents at the end of traffic jams."

Humbaur

Humbaur is one of the biggest in the world of trailers and vehicle bodies. The owner-managed family business offers around 420 different standard trailer models for commercial and private customers and 230 models of its FlexBox vehicle bodies. With 600 employees, around 60,000 trailers p.a. are produced at the Gersthofen site. The expert for trailers and transport solutions from 750 kg to 50 t total weight is active nationally and internationally and also manufactures special and customised solutions. More than 500 dealers in Germany and 26 European countries offer competent contact persons directly at the doorstep.

Institute for Continuing Education, Knowledge and Technology Transfer

ALFRIED stands for automated and networked driving (AVF) in logistics at the Friedrichshafen test site. The project, funded by the BMDV, deals with the challenges of inner-city goods transport and factory traffic in a complex transport system. Such traffic is often perceived as a hindrance or even a danger for other road users. Improved traffic flow can increase traffic efficiency for the safety of all road users, reduce congestion and achieve positive environmental effects for affected residents. AVF and Intelligent Transport Systems (ITS) provide solutions for this.

JIT Play

"From the industry, for the industry", JITpay™ has developed innovative products to solve the problem of long payment terms in the industry. As a financial service provider specialising in the transport industry, JITpay™ takes care of the entire service settlement for the contractor. This involves the use of a modern, digital factoring programme, which enables transport contractors to receive immediate payouts of their receivables and clients to benefit from flexible payment terms.

Jonescu

Jonescu has been making tough, reliable mudguards for commercial vehicles for over 50 years and will be showing examples from its well-known X-Gard and HighGard ranges. HighGard are tough, versatile and affordable extruded mudguards available in a wide range of sizes. X-Gard is the premium option, robust rotationally moulded mudguards that are also available as flat-tops and tandems.

Jost

JOST makes the demanding job of a truck driver easier with the latest safety technology and smart assistance systems for commercial vehicles. At NUFAM 2023, the international public will experience the portfolio in the hall and on the open-air site. Highlights include the KKS automatic coupling system with the new retrofittable KKS-U Connector and the King Pin Finder.

Junge

As one of the market-leading body manufacturers, Junge Fahrzeugbau GmbH will also be represented as a co-exhibitor with several exhibits on various exhibition stands. The most diverse body solutions from the LIGHTSTAR, LOADSTAR and BIKESTAR product ranges for distribution transport up to the last mile will be presented to the trade public.

Jungheinrich

For 70 years, Jungheinrich has been driving the development of innovative and sustainable products and solutions for all aspects of material flow as one of the world's leading solution providers for intralogistics. As a pioneer in its industry, the Hamburg-based family-owned company is committed to shaping the warehouse of the future.

Kempf vehicle construction

KEMPF's vehicles offer a multitude of advantages which leave nothing to be desired in terms of functionality, reliability and profitability. Whether on construction sites, in the agricultural sector or in the recycling industry, the steel or aluminium skips are versatile in use.

ReFuels

Synthetic fuels from renewable energies, so-called reFuels, promise a CO2 reduction of up to 90 percent compared to conventional fuels. They can be produced in large quantities and can already be used in almost all vehicles, especially in heavy-duty traffic. Researchers at the Karlsruhe Institute of Technology (KIT) have proven this in large-scale projects. The InnoFuels platform is intended to network the many national and European research projects on the further development, production and application of power-to-liquid and biofuels, to identify synergies and thus help to accelerate the production of larger quantities of electricity-based liquid fuels in particular.

Kögel

Kögel is one of the leading trailer manufacturers in Europe. With its commercial vehicles and transport solutions for the haulage and construction industries, the company has been offering engineering-driven quality "Made in Germany" for more than 85 years. Kögel sees itself as responsible for making transport and logistics processes environmentally and climate-friendly in agreement with politicians and customers.

Königsberg landing protection district

The Königsberg Load Securing Circle e.V. KLSK® emerged from the idea of bringing experts from different areas of load securing to one table to exchange experiences. In 2002, the Königsberg Load Safety Circle e.V. KLSK®, which is recognized as a non-profit organization, was founded. Absolute neutrality is the club's top priority. The aim of the KLSK® is not to market products. Our only goal is to increase road safety. However, there are technical aids that support the achievement of the club's goal but are not available or not available on the market. These are manufactured or commissioned and sold by the club itself.

Kress

KRESS Fahrzeugbau GmbH is a medium-sized family business that has specialized in the development and production of economical, efficient refrigerated vehicles and refrigerated bodies in premium quality for 20 years. In Meckesheim near Heidelberg, around 500 refrigerated vans, refrigerated trucks and refrigerated trailers are specified and completely manufactured every year. KRESS works with all renowned commercial vehicle manufacturers.

Crown

As a holistic mobility consultant, KRONE relies on an overall view of the mobility needs of its customers. As one of the pioneers in innovation and sustainability, the company will present its current portfolio at NUFAM 2023. A highlight is the Profi Liner in the 5th generation, where KRONE highlights the solutions in the area of load securing. In addition, the family-owned company is driving the trailer service forward with a comprehensive service package consisting of financing, flexible service modules, spare parts service and 24-hour emergency call.

KRPAN

The company PIŠEK-Vitli KRPAN was founded in 1977 and is today one of the world's most recognized companies in the forestry machinery industry. Our main product is the forest rope winch. The production program also includes other forestry machines, such as forestry trailers with cranes, wood splitters, fuelwood

conditioners, circular saws with conveyor belts, firewood bundlers, tractor tipping boxes, heavy timber cranes, grabs and other forestry machines.

Langendorf

Langendorf GmbH was founded in 1889 and is based in Waltrop (eastern Ruhr area). Around 400 employees produce more than 1,500 vehicles per year. The product range includes inner loaders for the transport of finished elements made of concrete, brick or wood, inner loaders for flat glass as well as double-deck inner loaders with box body, semi-trailers with steel or aluminium hollows, tipping bodies for motor cars, low-loader trailers and low-loader semi-trailers. In addition, Waltrop designs and manufactures a wide variety of special bodies according to customer specifications. Langendorf Service GmbH, which bundles all maintenance and repairs, and Langendorf Trading GmbH, which sells and rents used vehicles throughout Europe, are also part of the group.

Logi Apps

With the LogiApps software developed by Silvast Software, you can manage and improve the operations of your transport company. The cloud-based operating model is the ERP solution not only for large transport companies but especially for small and medium-sized transport companies a modern and cost-effective tool with many advantages.

Logicline

LogicLine is Europe's leading supplier of load securing systems for platform vehicles and pick-ups – sophisticated transport boxes, load carriers, tarpaulin bodies and a wide range of accessories. For more than 15 years, the medium-sized Austrian company has been developing and manufacturing systems for legally compliant and safe transport of tools and materials.

Mansio

At NuFam 2023 three Aachen innovators – MANSIO GmbH, PEM Motion GmbH and the FIR at RWTH Aachen – will present an innovative transport system for road freight transport and a smart theft protection system for trailers. The MANSIO transport system is based on the principle of encounter traffic: in the course of a transport, a truck hands over its semi-trailer ("trailer") to another truck and returns to the region of origin with the trailer of another haulier. With this solution, freight forwarders can reduce their transport costs, maintain their independence, improve working conditions for the transport staff and, in the long term, make an active contribution to environmental protection.

Martin Knirsch Motor vehicles

With more than 50 years of experience, we develop and deliver custom-made commercial vehicles. We rely on the brands SCANIA, Schwarzmüller and Hüffermann, which are among the technologically leading companies in the transport industry and meet the highest demands in terms of longevity, reliability and cost-effectiveness. With our four workshop locations and two service partners from Karlsruhe to Freiburg, we offer our customers a service network with a high quality standard.

Martins

MARTINS is a global leader in tyre and wheel equipment solutions. Known for innovation and quality, the company offers a wide range of products, including tire stands, tire inflatable cages, tire balance beads, wheel nut indicators and tire handling devices. Their expertise and commitment have made them a reliable partner in the industry.

Meiller

Since 1850, the Munich-based family company MEILLER has developed from a blacksmith to a globally active group. Characterized by continuous growth, MEILLER has steadily expanded its range of services and expertise and has developed as a system supplier for innovative and high-quality tipping bodies into the market leader in the construction, waste management and commercial vehicle industries.

Mekom

Founded in 1976, Prinx Chengshan is a modern tyre manufacturer whose portfolio includes passenger car/SUV/4x4 as well as transporter tyres, truck tyres and bus tyres. The four renowned tyre brands Austone, Fortune, PRINX and Chengshan are sold. Prinx Chengshan Europe is exhibiting at NUFAM together with its wholesale partner Küke. In Karlsruhe, the tire manufacturer concentrates on its truck range and presents only bestsellers and new developments.

Mekratronics

At this year's NUFAM, the highlights at the MEKRATronics booth are intelligent vision systems that make driving and manoeuvring of commercial vehicles safer. From the classic rear-view camera system to radar-based cornering assistance systems to AI-supported person recognition, MERKATronics offers a variety of tailor-made solutions for the commercial vehicle industry.

Merkol

Securing the cargo is a key aspect in transport. Merkol offers a wide range of products for load securing, including lashing belts, anti-slip mats and special fastening systems. These products ensure reliable and safe cargo securing to get goods and goods safely to their destination.

Mitsubishi Heavy Industries Thermal Transport Europe GmbH

MTTE, which was founded in 2018 in Osnabrück, started with the aim of bringing environmentally friendly and service-friendly transport refrigeration systems to the market for a quieter and more efficient cold chain. MTTE is a joint venture between Mitsubishi and the chiller specialist HEIFO, which has been the general importer of Japanese Mitsubishi chillers since 1998.

MLV Systems

With mlv.Guide you can master your everyday transport processes much easier: efficiently, time-saving and always with a good overview. Everything in one place: consistent and secure, quickly findable and without cluttering in common office programs with countless files. Nothing is lost or forgotten. With mlv.Guide, every important detail, appointment or re-planning is always well under control, regardless of whether customer requirements, vehicle maintenance or a suitable connection tour.

Nadler road technology

amtec manufactures a comprehensive range of thermocontainers, thermo troughs and asphalt distributors. The sturdy Hardox superstructures guarantee high payload, perfect insulation and effective condensation protection. A special highlight of amtec is the SBS safety control system.

Neovaria

With its own demonstration vehicle, the Neovaria OHG presents two product groups in particular. The BEKS drawer system and grooved stone fittings. The BEKS drawer system is based on a unique pull-out mechanism that does not require lateral telescopic rails and is therefore virtually maintenance-free. The system consists of lightweight and durable materials, is modular, can be combined in height and width as desired and can be expanded with a variety of accessories. Our groove fittings offer a drill-free mounting solution for all common Van seat rails. The groove stones are designed to fix vehicle fixtures, dog boxes, bicycle racks or similar and can be shifted in the respective seat rail in the existing grid dimension.

NEV Commercial Vehicle Engineering GmbH

NEV Nutzfahrzeug-Technik GmbH was founded in 2007 in Hagenbach and currently has 22 employees. Since its foundation, there has been a close cooperation with F&B Nutzfahrzeug-Technik GmbH, a conversion partner of Daimler Truck AG for over 25 years. Many of the designs developed at NEV have already been realized there in close cooperation. External customers also benefit from our design and development services.

Padoan

Padoan Deutschland GmbH presents the commercial vehicle tanks of Padoan Srl, hydraulic tractor equipment and hydraulic components at NUFAM 2023. The special features of the products are the excellent quality and price-performance ratio of the individual components as well as the configuration of the tractor hydraulics exclusively according to customer and application requirements

PHP Lawyers

PHP is highly specialized and develops targeted, legally secure service solutions for car dealerships, fleets and mobility service providers. With a highly competent team of transport experts, insurance specialists and specialized lawyers as well as a strong partner network. PHP ensures clarity, security and creates added value in all phases of damage management.

PlugVan

At NUFAM 2023, the Berlin-based start-up PlugVan will be presenting its flexible modules for 3.5-ton vehicles, vans and trailers. With the modules, the vehicles can be converted into a camper, a mobile workshop, a goods transporter or a mobile office. The conversion takes 5 minutes and can be done by one person. Just slide in and without any changes to the base vehicle.

Pneuhage

The Karlsruhe Tyre Trading Group Pneuhage has been involved as an exhibitor for the trade fair since the very first NUFAM. Sustainable products and services will also be presented at this year's participation in the dm-Arena on stand A409. Both have been part of the company's philosophy since it was founded 70 years ago. The aim of the family business has always been long-term customer satisfaction through consumption and resource-optimizing tire concepts.

Pommier

POMMIER, expert and multi-specialist in equipment for European bodybuilders, is a supplier of reference solutions in 5 product areas: couplings, protection devices, fastenings, openings and lighting. At NUFAM 2023, POMMIER will present the remote-controlled handle TORSEO 16-UL HMO at its stand.

Radolid

RADOLID is your partner for high-quality plastic wheel nut caps. As a market leader, our task is to continuously develop our products to meet the high demands of our customers. Therefore, we offer you a high degree of individualization of our wheel nut caps type KSW.

Rapid lightweight construction

With its unique plastic welding technology in Central Europe, RAPID Leichtbau GmbH manufactures lightweight, sturdy and individually designed case bodies from welded sandwich panels for all transporter and truck manufacturers. "So that our customers can carry out their transports even more efficiently, cost-effectively and with less wear!" RAPID is a certified partner for trunk bodies of Fiat, Ford, Iveco, MAN, Mercedes-Benz Trucks, Mercedes-Benz Vans, Nissan, Opel, Renault and Volkswagen.

Tyre central Becker

The Reifenzentrale Becker GmbH, headquartered in Bitburg, was founded in 1949. What started as a small business back then is now a well-established wholesaler with attached tyre and spare parts dealers. With a highly motivated team and state-of-the-art technology, the Becker Tyre Centre serves its customers from four locations (Bitburg, Badem, Daun and Ormont). Since 2015, the company has been the exclusive sales partner for torque truck tires in the DACH region.

Reiff Tyres

The renowned mobility provider REIFF Süddeutschland Reifen und KFZ-Technik GmbH uses the stage of NUFAM 2023 to present pioneering mobility concepts. The trade fair in Karlsruhe offers the company an ideal platform to draw visitors' attention to the sustainable mobility of tomorrow.

Renault Trucks

At this year's NUFAM, Renault Trucks, together with its distribution partner Tiropatrans and body manufacturers Orten Fahrzeugbau and VanSelect, will be presenting its concentrated expertise in the field of electromobility: the Renault Trucks E-Tech D & D Wide series for distribution transport, the Renault Trucks E-Tech

C for heavy construction site transport and the Renault Trucks E-Tech Master for the Last Mile. These electric vehicles illustrate in which segments the use of electric vehicles is already possible today.

Rennie Expert

Which actor in freight forwarding is responsible for what? And how can you counteract problems with authorities or transport damage? The manufacturer-independent expert team around Christian Rennie and Christian Schmid is keen to help you clarify this issue, to act in an organized and protected manner, but also to create arguments for good discussions with other involved persons.

Rigdon

RIGDON is a medium-sized company with around 100 employees. RIGDON operates one of the largest independent tire retreading plants in Germany in Günzburg, Swabia. We renew tires from small solid rubber tires to cars, trucks and large tires with up to 3 meters in diameter. RIGDON also has 2 service branches in Günzburg and Neu-Ulm.

Ronal

From 21-24 September 2023, SPEEDLINE TRUCK, part of the RONAL GROUP, will be exhibiting its product range of aluminium wheels for trucks, buses and trailers for the first time at the NUFAM commercial vehicle trade fair in Karlsruhe. Also, some wheels from the RONAL passenger car.

S&G Automotive

For the eighth time this year, NUFAM – the commercial vehicle fair will take place in Karlsruhe. Once again this year, the five leading Mercedes-Benz Commercial Vehicle Centers from Baden-Württemberg will combine their combined expertise at a common stand! Wackenhut GmbH & Co. KG, Kestenholtz GmbH, Riess GmbH & Co. KG and Südsterne - Bölle AG & Co. KG will join forces with the founding member of NUFAM S&G Automobil AG.

SAF Netherlands

Solutions for chassis, axle systems and electronic brake system modules: Since the successful acquisition of the Swedish brake system specialist Haldex by SAF-HOLLAND, the two companies have continued to grow together and will present themselves on a single stand at NUFAM 2023. In Hall 2, Stand C203, visitors will learn how to meet the growth areas of the future together and how the industry will

benefit from the merger. A highlight in Karlsruhe: Both SAF-HOLLAND and Haldex have answers to the EU regulation on tyre pressure monitoring.

Satlog

At NUFAM 2023, SATLOG will showcase its new integration solution consisting of truck tablet, person recognition with AI camera and video recording. "The aim was to give the driver a good feeling that he has all the information available on a monitor in the vehicle and is thus alerted even when people are in the shunting area of the truck, e.g. during waste disposal or on construction site operations," says Dr. Jürgen Stausberg, Managing Director of SATLOG GmbH.

Schoon Vehicle Systems

As wide-ranging as the tasks of the individual industries, the requirements for the fleet used are as diverse as the requirements. For more than 60 years Schoon Fahrzeugsysteme from Wiesmoor has specialized in customer-specific assembly, disassembly and conversion of chassis, vans and pick-ups up to 7.5 tons gross weight. Everything is done from a single source.

Schwanheimer industrial glue

We have been producing our products in our factory in Schwanheim (Baden Württemberg) for over 40 years. We are the only adhesive manufacturer that produces adhesives in Germany. This ensures a unique and consistent quality of the products "Made in Germany". Our adhesives are stable for several years because they do not contain any solvents. Thus, there is no drying out or permanently glued tips as with commercial products. Our adhesive reacts to oxygen deprivation and thus adheres to all perfectly fitting surfaces (irrespective of material).

Service company German craftsmanship

Interested craftsmen from all trades will have the opportunity to get personal advice from SDH contacts at the exhibition stand and to find out about SDH membership, current discounts on company cars and special promotions tailored to the craft. True to the slogan "We move the craft", the SDH mediates attractive car discounts to craft businesses through direct framework contracts with 26 well-known automobile manufacturers via so-called call-in vouchers.

Skirion

New sliding door kit for temperature controlled vehicles. A practical solution for delivery and the last mile in urban areas, allowing lateral loading and unloading in

confined spaces, thanks to the horizontal displacement that leads to a complete opening of the door. Mounting is possible for both opening directions, with a simple and easy to install mechanism with pre-assembled modules.

Sonax

Since 1950, the family-owned company in Neuburg an der Donau has been developing and producing high-performance products with the highest quality standards "Made in Germany". In addition to numerous articles for car care, the range also includes a comprehensive range of special products for commercial vehicles. Many of the cleaning and care products are also available in the usual container sizes for commercial vehicles. Sonax has been the market leader in automotive care products in Germany for many years and at the same time one of the international leaders in this field with representatives in more than 110 countries worldwide.

Sörensen

This year, Sörensen will be exhibiting at the NUFAM commercial vehicle trade fair for the first time. As a partner of the VanSelect commercial vehicle portal, the Hamburg-based loading platform manufacturer will be exhibiting at the joint stand C302 in Hall 3. At the VanSelect stand, a total of four different Sörensen side panels will be presented. One of these is the X1A 750 – the top seller

SpanSet

SpanSet GmbH & Co. KG, Übach-Palenberg, is a leading manufacturer of lifting and load securing technology as well as personal protective equipment for height securing. Own companies in 22 countries on five continents offer customers worldwide service. At SpanSet GmbH & Co KG in Übach-Palenberg, more than 160 employees weave, dye and assemble approx. 750,000 meters of webbing and fabric hoses per month. In addition to the production and marketing of high-quality technical textiles, a comprehensive range of services complements the product range. This includes inspection and repair services, consulting, expert opinions, certifications and technical seminars.

Speedywash

At this year's NUFAM, brush washing system specialist Speedywash will present a small selection from its 20 version portfolio of mobile brush washing systems with the Standard, Basic Diesel and Battery Easydrive models. The cable- and hose-bound standard as well as the Basic Diesel, equipped with water tank and diesel engine on

board, are affordable entry-level models that already pay off in small fleets with a few vehicles.

Sharpener

In 1872, Johann Spitzer laid the foundation stone for today's corporate group. That year, he registered his company for the production and sale of agricultural goods in the Commercial Register. Today the company presents itself as an internationally active group and is one of the leading manufacturers of silo vehicles and bodies in Europe. The extensive know-how that Spitzer can draw on for the development and production of customer-oriented vehicles goes back a long way. Because Spitzer was the pioneer in this special segment: the first silo vehicle to come on the market bore the Spitzer label.

Terberg Special Vehicles

Terberg Spezialfahrzeuge GmbH, headquartered in Hamburg, Germany, is a subsidiary of the Dutch family-owned company Terberg. The company was founded in 1869 in Benschop, NL, and is still wholly family owned. The Royal Terberg Group today comprises a number of operating companies serving different parts of the vehicle-related market. These robust vehicles are active in ports, distribution centres, heavy industry, tunnelling areas, marshalling yards and airports in over 130 countries. Terberg Spezialfahrzeuge oversees the distribution of the vehicles manufactured in the Netherlands for the D-A-CH region. The portfolio also includes spare parts and accessories as well as a comprehensive service in the area of vehicle repair and rental as well as the brokerage of used vehicles.

Tirecheck

TireCheck is a full-service provider of networked tire pressure monitoring systems (TPMS). At NUFAM, the company will present its complete product range and inform visitors about the technical requirements of the upcoming European legislation on RDKS for commercial vehicles. At the same time, TireCheck offers you the right solutions to equip all commercial vehicles in accordance with the regulations.

Transport-refrigeration-distribution

Transport-Kälte-Vertrieb GmbH has been your reliable and competent partner in the field of transport refrigeration for over 50 years. In Baden-Württemberg and Bavaria, the company represents the well-known brands Thermo King and Frigoblock in the sales and service sector. With numerous innovative products, telematics and pharmaceutical expertise as well as more than 80 mobile service technicians, tkv*

provides you with customer- and user-oriented solutions for transport refrigeration. The tkv* mobile service comes to you on site and actively helps you save resources.

TYNe

ShareX Mobility AG had the idea to set up so-called last-mile logistics hubs close to the town so that only one environmentally friendly vehicle could deliver the goods to customers from there. Compact vehicles are required for this last mile logistics. It is a good coincidence that ShareX has held intensive discussions with Albert Weber Holding GmbH in Markdorf since 2021 about the strategic market entry of a small e-transporter. This collaboration between two Swabian-based companies resulted in the TYNe, which is now being presented at NUFAM Karlsruhe.

Van Clewe

With GRIPTEX we present sustainable and durable anti-slip materials for load securing. Our product portfolio includes various anti-slip mats and a belt protector. The special thing about our products is that we use a textile backing material, which is rubberized. The textile base gives the products an enormous tear resistance and the applied coating the anti-slip function and a coating that does not break, crumble or abrasion.

Van Select

VanSelect GmbH & Co. KG, based in Hollenstedt, Lower Saxony, was founded in 2015 and sees itself as a network of people, companies, products and data. In addition to networking events and trade fairs, VanSelect deals with IT systems to digitize the sale of prefabricated and converted commercial vehicles and to simplify it for the retail trade.

VauQaudrat

At this year's NUFAM trade fair in Karlsruhe the company VauQuadrat from Offenburg in southern Baden will also participate. As a co-exhibitor at Weber at DM-Arena stand 406, the current V2 and V3 depth induction units will be presented – especially for commercial vehicle workshops in the application for buses, trucks, agricultural machinery or municipal technology.

Versus Omega

Versus-Omega presents numerous products for curtainsider bodies. Versus has different systems in the program for this. Starting with the sliding roof and sliding

tarpaulin systems (Omega and Penta), through the roof lift systems (Axces) up to complete superstructure kits (kits).

WD-40

The WD-40® Company Limited Branch Germany develops and markets maintenance and care products for industry and crafts as well as for hobby and household. The WD-40® multifunction product has proven itself millions of times in many areas of application and has been convincing for over 60 years by its quality and versatility. In addition, the WD-40 SPECIALIST® products for the automotive and commercial vehicle industry offer targeted solutions such as special material compatibility and temperature resistance, which were developed in extensive tests and in collaboration with professional users.

Webfleet

Webfleet is Bridgestone's globally proven fleet management solution. More than 60,000 companies around the world use them to improve the efficiency of their fleets, make their drivers' daily work easier, make their operations safer, comply with regulations and act more sustainably. For more than 20 years, Webfleet has provided fleet managers with data-driven insights to optimize their operations.

Wex

WEX is one of the largest fuel card providers in Europe. With tailor-made fuel card solutions such as the Esso Card™, the company is precisely tailored to the fuel needs of its customers and helps to improve the performance and efficiency of any fleet – regardless of company size.

Wielton

Wielton, one of the TOP 3 manufacturers of semi-trailers and truck bodies in Europe, will present 8 innovative products at NUFAM. From 21 to 24 September, visitors will be able to see the new products of the Polish manufacturer in the exhibition hall, including the Scrap Master tipper, the Recycle Master sliding hook semi-trailer and the Curtain Swap Master swap bridge as well as the range of vehicle configurations. In addition, solutions and products of the Aberg brand will be on display.

Wingliner

The ease of use of our truck body kits is unbeatable thanks to Wingliner technology. We make your deliveries faster, more convenient and safer – and are therefore the ultimate alternative to classic van bodies. Or rather: the alternative without

alternatives. Fully automatic & adaptable, we always adapt to the requirements of our customers. The Wingliner System is a patented hydraulic opening system for trucks. It combines robustness with flexibility, reliability with comfort. And it's also fast: it opens every truck in 10 seconds at the touch of a button.

Winkler Group of Companies

The Winkler Group is one of the leading wholesalers of commercial vehicle spare parts in Europe. Around 1,600 employees at more than 40 locations in Germany, Austria, Latvia, Poland, the Czech Republic, Switzerland and Slovakia provide individual support to commercial vehicle owners, workshops, bus and agricultural companies. From three of the largest central warehouses for commercial vehicle parts in Europe with more than 200,000 spare parts, the goods reach the customer as quickly as possible via a sophisticated logistics and delivery concept.

Wistra

At NUFAM, Wistra GmbH Cargo Control, which specialises in the development and manufacture of cargo securing devices, is presenting the easy-to-use "Control+" intermediate wall lock, which informs the user with a force-clamping indicator when the required preload force has been reached. In addition to the "Control+", Wistra is showing its extended range in Karlsruhe with many other innovations, which has been supplemented with various edge protection corners, for example. Other novelties such as the Multi-Beam bar and the clamping pin presented last year are now available to order.

Würth

Würth Truck Lease GmbH, a member of the internationally renowned Würth Group, will once again present itself at NUFAM this year in order to strengthen its presence as a reliable partner in the commercial vehicle and transport industry. From 21 to 24 September, visitors will have the opportunity to find out about different financing solutions and to get in touch with the experts on site.

Zeliox

Zeliox is a leading provider of power solutions for commercial vehicles dedicated to providing reliable and sustainable power systems. With a focus on innovation and customer satisfaction, the Zeliox ECO is distinguished by its remarkable features that meet the needs of commercial vehicle owners and operators.

ZF Group

ZF is a globally active technology group and supplies systems for the mobility of passenger cars, commercial vehicles and industrial technology. ZF lets vehicles see, think and act: In the four technology fields of Vehicle Motion Control, Integrated Safety, Automated Driving and Electromobility, ZF offers comprehensive product and software solutions for established vehicle manufacturers as well as emerging providers of transport and mobility services. ZF electrifies vehicles of a wide range of categories and contributes with its products to reducing emissions, protecting the climate and making mobility safer.
